ACCREDITMX

AccreditMX is a solution that aims to make the task of issuing & managing accreditation for events & activities easier. It offers both printed and digital forms of accreditation, which can be utilized for both long-term events and short-term activities. This simplifies the tracking & management of accreditation for organizations.

LONG TERM ACCREDITATION

AccreditMX platform provides a method of obtaining long-term accreditation for those who intend to stay with the organization for an extended period of time while requiring the necessary permits for their employment. This process involves uploading the application and permit requests onto the AccreditMX platform, which will evaluate their qualifications, credentials and any other relevant information to ensure they meet the required requirements.

SHORT TERM ACCREDITATION

AccreditMX offers "One Pass" short-term accreditation, which is designed to provide temporary accreditation for a specific event or date. Attendees, staff, and other participants can use this type of accreditation to gain access to a venue or activity. Short-term accreditation is a critical solution for managing access control and ensuring participant safety at temporary events or venues.

-  Social Media Influencers
-  Media Coverage
-  Protocol
-  Deliveries
-  Emergency and etc.

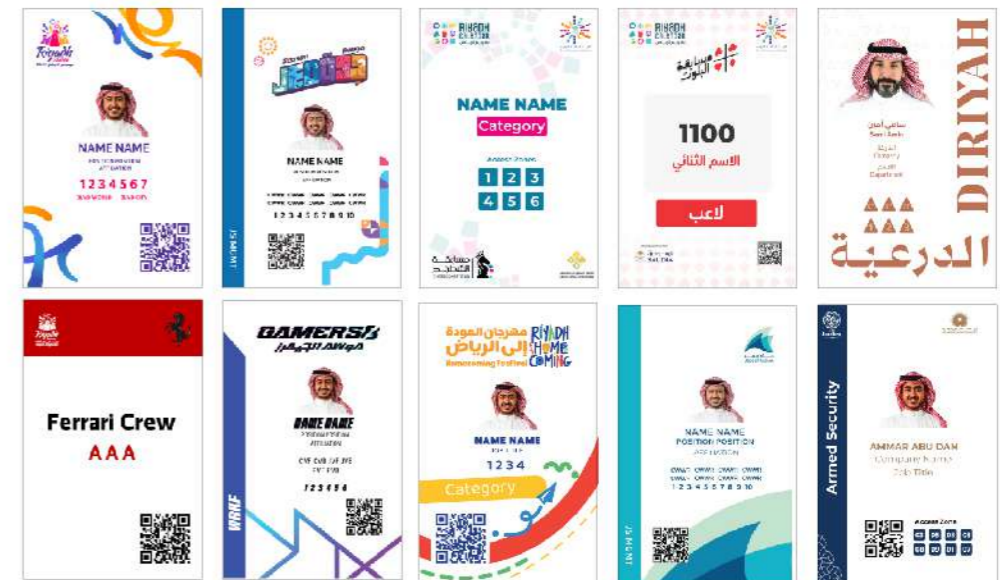

SHARED LINK

AccreditMX platform includes a feature that allows participants to receive a shared link via email or other channels. This feature allows participants to access & upload their accreditation materials from any device, eliminating the need for physical visits to an accreditation center.

CUSTOMIZED DESIGN

AccreditMX allows to customize accreditation badges with sponsors' logos or other branding elements, adding a marketing layer to the event experience. This feature enables event organizers to provide a distinctive & appealing design for badges while also promoting their sponsors to attendees.

INTEGRATION

AccreditMX offers flexibility in integrating with different systems, enabling event organizers to manage accreditation and related data easily and efficiently. This feature makes it easier for organizers to handle a variety of tasks related to event management, such as registration, ticketing, and access control.

SCANNING

AccreditMX accreditation badges add an extra layer of security by including a QR code that can be scanned to check the status of the accreditation. The codes provide a visual representation of accreditation status, indicating whether or not the badge is valid. Scanning badges enables event organizers to verify accreditation status & ensure that only authorized participants gain access to the event or venue.

PRINTING

AccreditMX offers an operations center in every venue or zone, functioning as a support center for users.

The operations center handles the printing and distribution of badges, which enables participants to receive their badges promptly, even if they register at the last minute or require an accreditation on short notice.

AWS SERVERS

AccreditMX platform offers a secure data storage system to keep users' information safe.

The platform uses AWS servers to store user data, and AWS follows strict security protocols to ensure compliance with data privacy regulations.

REPORT

AccreditMX provides comprehensive reports & dashboards for event organizers, offering valuable insights & data-driven decision-making capabilities.

By collecting and analyzing data on attendee behavior, event organizers can identify areas for improvement and make data-driven decisions to optimize their operations.

Power BI

DataMX

CRM

AccreditMX platform provides an unlimited way for event organizers to connect with customers through an integrated CRM system that enables them to build & maintain lasting relationships effectively.

The CRM system provides a complete view of customer interactions, tracks past communication, & stores customer data for improved engagement & personalized marketing.
